

Frontend Software Engineer

Location - Victoria Island, Lagos Nigeria.

About Us

My client is building current accounts for SMEs, entrepreneurs and freelancers in Nigeria.

We're on a mission to empower business owners with the tools they need to succeed. We believe a thriving business not only benefits it's customers, owners and employees but society at large, by increasing wealth, solving difficult problems and inspiring innovation.

We're backed by experienced US and Nigerian investors, as a company we are committed to building a culture of excellence, happiness, respect and success. As one of our early team members, you will be an important part of our growth and culture.

The Role

You will be part of the team responsible for the design, architect and build of aesthetically-pleasing modern interfaces for our Web & Mobile products. Bringing products and features to life, taking into careful consideration UX/UI design best practices. Collaborating, testing and iterating core product features.

You will have:

- 3 years minimum experience in Frontend Development.
- Creative and innovative problem-solver.
- Agile in development.
- Code junkie and hungry.
- Strong design and programming skills.
- Must have a deep understanding of Javascript, HTML and React web framework. ● Very good understanding of Styling and CSS ● Clean code advocate.
- Good communication skills.
- Fast and infinite learner.
- Creative Skills.
- Excellent taste in Color Combinations.
- Proficient in modern design technologies and interfaces.
- Strong Graphic Design skills.
- Ability to translate mockups to code.
- Expert using Design Softwares like Sketch, Zeplin, Adobe Illustrator, Framer, Photoshop etc.
- Experience with modern browser technologies (Mobile Web).

- Experience with Minification and saving of web resources for faster rendering in browsers.
- Interactive Design knowledge. Knowledge about Progressive Web Apps.

The highly desirables:

- Previous experience owning and running a business or side hustle, no matter how big or small.
- Experience building interfaces and prototypes for Mobile Apps (iOS & Android) using React Native and Redux
